

Effect Pouncing Machine Type 336

(Edition 2017/09)

By the rotary grinding pad one achieves on the effect pouncing machine high-class effects like chamois, suede, simian skin, Buff-coloured, antilope and similar.

In spite of the automatically surface treatment ruling today is, hence, this machine for remachinings of man's hat brims and lady's hats in these qualities necessarily.

The closed steel construction has an at an angle arranged working spindle. Hence, the greater process can observed during the whole work well with straight posture of the operator

Four different operating speeds can be chosen by putting down a fan belt. The

feed role also has 4 Speed. They are put suitably to the grinding spindle speed.

The working spindle can be equipped with a quick-stop-equipment on extra charge. The time-consuming settle of the friction pad with the paper change is thereby reduced to a minimum.

A well regulable poster permits predetermining abrasive strength. Thereby is a better work possibly. A strong dust exhaust leads the attacking abrasive dust immediately from the pad in an available extraction line or in a dust bag.

Technical Data

Length approx.	900 mm
	35,4 inch
Width approx.	600 mm
	23,6 inch
Height approx.	1400 mm
	55,1 inch
Measurements of case approx	1100 x 840 x 1700 mm
	43,1 x 33,1 x 67,0 inch
Weight	
net approx.	290 kg
	639,34 lbs
gross approx.	380 kg
	837,8 lbs
installed required approx.	0,75 kW
